

Muizzuddin Thaqif Ramlee

Software Engineer — Integration & Delivery · Backend · APIs · Cloud & Kubernetes

Kuala Lumpur, Malaysia · [Add real email here] · [Add real LinkedIn URL here] · [Add real GitHub URL here]

PROFESSIONAL SUMMARY

Software engineer working on the systems that sit between applications rather than the ones people click on directly — integration middleware, API mapping, and the backend plumbing that keeps a core banking platform talking to everything around it.

EXPERIENCE

Software Engineer, Project Delivery & Integration — Silverlake

Kuala Lumpur, Malaysia · 2024 – Present

- Configure and debug API data mappings translating JSON payloads between a core banking host and external channel/partner systems.
- Perform gap analysis between payload structures and mapping specifications; raise and track change/incident requests with the platform vendor.
- Diagnose integration defects spanning mapping configuration, field-processing scripts, and date/format handling.
- Work within Kubernetes-based deployment environments to reproduce and validate fixes across DEV, SIT and UAT.

Frontend Intern — NexMind

2023

- Built frontend features for the Text2Social project using Vue.js.
- Integrated OAuth-based SDK authentication flows for connecting third-party social accounts.

EDUCATION

Bachelor of Software Engineering

Universiti Kebangsaan Malaysia (UKM) · CGPA 3.47

TECHNICAL SKILLS

Programming: Java, TypeScript, JavaScript, SQL, Lua, Go (learning)

Backend: Spring Boot, REST APIs, API Integration & Mapping, Kafka, Node.js

Cloud / Infrastructure: Kubernetes, Docker, Helm, Linux

Database: MySQL, TiDB, MariaDB, Liquibase

Tools: Git, GitLab, Postman, DBeaver, VS Code

PROJECTS

Core Banking Integration Middleware (Case Study) — Configuring and debugging the mapping layer between a core banking platform and its channel systems.

Kubernetes Home Lab — Self-hosted Minikube cluster used to learn Deployments, Services, ConfigMaps, Ingress and PV/PVC hands-on.

ACHIEVEMENTS

[Add achievements or awards here as they come up.]
